NIGHT STORM

SPOTTING SCOPE

The NightStorm® is a top of the line rugged hand held spotting scope. Available in 1st, 2nd, 3rd or 4th generation the Night Storm is one of the best monoculars made. Quality was our number one priority when we created the Night Storm. By using an all glass revolutionary F1.2 lens we were able to achieve an amazing 98.5% light transmission. What this means is that we were able to create a unit with the brightest and sharpest image available. Plus, the Night Storm is 100% waterproof and if dropped in the water it will float for easy recovery. Strict standards and precision manufacturing have brought to you a rugged, yet lightweight, waterproof night vision device, which provides superior optical calibration at an economical cost. Whether you are boating, observing wildlife, in Law Enforcement, or providing security for your home, the Night Storm is an excellent choice for your night vision needs.

The Night Storm LE is designed for Law Enforcement use. Comes with 1.5x lens for brighter image and wider field of view. Available in 1st, 2nd, 3rd or 4th generation.
