

# MEPRO M22 PRO

## Self-Illuminated Reflex Sight with Light Module

The Mepro M22 PRO features a factory-installed light module that eliminates reticle washout and enhances low-light performance. With cutting-edge fiber-optic illumination for daylight visibility and premium Swiss-manufactured tritium vials for nighttime clarity, this sight operates seamlessly in any lighting condition—no batteries required (unless you want it).

Tritium glows at a certain brightness level 24/7/365. Meprolight engineers designed a battery powered mechanism to enhance the reticle in extremely low light. The single CR2032 battery provides over 50,000 hours of use. The auto-adjuster reacts to ambient light to maintain a crisp reticle in the worst conditions. Do you need it for the M22 to work? No. It is there to mitigate the effects of adverse conditions.

The transition between fiber-optic and tritium systems is instantaneous and automatic, ensuring you're always ready. Built with rugged, battle-proven construction, the Mepro M22 PRO meets or exceeds rigorous standards to perform flawlessly in the harshest environments. It's reliable in all weather conditions and compatible with night vision devices (NVDs) and magnifiers for added versatility.

With a ten-year warranty on tritium luminance, the Mepro M22 PRO delivers unmatched performance. Prepare for any challenge and ensure your survival with the unwavering reliability of the Mepro M22. Elevate your shooting experience and trust in a sight designed to perform when it matters most!

## PROVEN ADVANTAGES

- Factory installed light module eliminates reticle washout and improves lowlight performance.
- Powered by a single CR2032
- 100% self-illuminated aiming solution; No batteries required
- Reticle illumination is auto-adjusted based on ambient light levels
- Available in a 3.5/40 MOA Bullseye, Red and Amber
- Compatible with NVDs and Magnifiers
- Compact, lightweight ergonomic design
- 10 Year warranty on tritium illuminance

## SPECS

- Weight: 9.2 oz (260 g)
- Dimensions: 3.9" x 1.9" x 2.7" (99 x 50 x 68 mm)
- Display Window Dimensions: 1" x 0.8" (25 x 20 mm)
- Reticle Color: Red, Amber
- Power Supply: 1x CR2032 Battery
- Battery Life: 50,000 hours
- Height Over Bore: 1.5" (39mm)
- Windage/Elevation Adjustment: 1 MOA
- Total Windage Adjustment: +/- 60 MOA
- Power Supply: Fiber Optic (Day) / Tritium(Night)
- Weapon Mount: Picatinny Rail Quick Release (MIL-STD 1913)
- Water Resistance: 1 meter for 30 minutes (IP67 rating)
- Operating Temp: -40°F to +140°F (-40°C to +60°C)
- Storage Temp: -40°F to +160°F (-40°C to +71°C)
