

# MEPRO MOR PRO

## Self-Illuminated Reflex Sight with Integrated Visible/IR Lasers

Get more with the Mepro MOR Pro. It is a three-in-one Mil-Spec reflex sight combined with an IR and visible laser in a single, compact unit. Three power sources – Fiber Optic technology during the day, a tritium capsule for reticle illumination at night and in low-light conditions, and two AA batteries. If one system goes down, even just one battery, the others kick in providing three adjustable LED brightness levels for round-the-clock reticle illumination. The Mepro MOR Pro is available in Bullseye or dot reticles with IR and green visible lasers, with tritium luminance warrantied for 10 years.

The co-witness zeroing system automatically syncs the visible and IR lasers to the reticle when it is zeroed. The kit includes an anti-reflective Flash Guard that minimizes lens reflections, helping to conceal the user's location without obstructing the field of view. The package also includes a 9-inch, "push-to-lase" pressure switch cable with both constant and momentary modes.

## PROVEN ADVANTAGES

- Self-Illuminated Three-In-One optic – Reflex Sight, IR Laser, and Visible Laser
- Co-witness zeroing system. Zero one system, others automatically zero simultaneously
- Selectable Class 3 High and coaxial-mounted Class 2 Low visible/IR laser output power
- Momentary or constant lasing modes by way of a Push to Lase (PTL) button
- 3 Way Power System – Tritium, Fiber-Optics, and two AA batteries.
- MIL-STD 1913 picatinny mount
- MIL-SPEC 810

## SPECS

- Lens Diameter: 30mm (1.1811 in.)
- Field of View: Unlimited with both eyes open
- Power source: Fiber Optic, Tritium, two AA batteries
- Reticle Options: 2.2 MOA Bullseye/ 4.3 MOA Dot
- Lasers colors: Green & IR
- Dimensions: (L x W x H): 150x63x73mm (5.91 x 2.48 x 2.87 in.)
- Weight: 430g. (15.52 oz.) w/o batteries
