

# Mepro CRIS

## Co-witness Reflex Illuminated Sight

Running a Mepro Pistol Optic but want to retain your co-witness? The Mepro CRIS iron sights are the perfect solution. Designed for a clean, lower third sight picture, they feature a blacked-out, Swiss-made tritium-illuminated front sight paired with a serrated rear sight.

With variants for popular pistols, this addition will upgrade your duty or concealed carry pistol with ease. Reference the millimeter height in the product description to ensure a co-witness on your pistol and optic combination.

Meprolight® — The first choice among law enforcement, defense decision-makers, and major weapon manufacturers. A full quality program, certified to ISO-9001:2008 and complying with NATO and US Military Specifications.
