The **Sightmark® series of Eclipse™ Night Vision Monoculars** are multifunctional optics inspired by military and law enforcement applications. The Eclipse 4x50 features a high light gathering capacity and an impressive magnification, making it perfect for observing moving targets at varying distances. A built-in IR illuminator extends viewing capabilities even farther, and is practically invisible to both animals and humans. Also, the advanced interior electronic system, designed to extend the operation time of the unit, gives the monocular up to 72 hours of constant battery life. With all these features, included accessories and a Limited Lifetime Warranty, the Eclipse 4x50 is a must-have for any recreational excursion or professional function.
