REFLECTOR

DESCRIPTION

Specially designed to meet the needs of law enforcement professionals, the SureFire G2X™ LE is a higher-output version of our best-selling G2X™ Pro that leads with high output on its first press or click. It features a high-performance LED that generates a max output of 400 lumens of blinding white light focused by a parabolic reflector into a versatile beam with significant reach and ample surround light for maintaining good situational awareness, crucial in law enforcement. At its lower output the G2X LE produces a useful 15-lumen beam that provides extended runtime on a set of batteries, for tasks that don't require as much light.

A click-style tactical tailcap switch controls the light's output—simply press or click to unleash all 400 lumens in momentary- or constant-on mode, an important feature for law enforcement applications where instant access to maximum output provides a tactical advantage. Return to off and press or click again within two seconds for G2X LE's lower-output 15-lumen beam.

FEATURES / BENEFITS

- Virtually indestructible LED emitter is regulated to maximize output and runtime
- Two output levels—high for maximum light, low for extended-runtime
- Parabolic reflector creates smooth, optimized beam with plenty of reach and surround light
- Click on/off tailcap switch meets needs of law enforcement—press for momentary-on high, click for constant-on high; return to off and press or click again for low
- Tough Nitrolon® polymer body and Mil-Spec hard-anodized bezel
- Weatherproof—O-ring and gasket sealed
- Backed by SureFire's No-Hassle Guarantee

SPECS

| | <i>G2XLE-BK</i> |
