DESCRIPTION

The M640T Turbo Scout Light® Pro weaponlight provides turbo beam performance in a lightweight and slim form factor with durability that can only come from SureFire. Powered by two 123A batteries, it delivers 700 lumens and 70,000 blazing candela in a concentrated, tightly focused beam pattern for positive long-range I.D. Like all Scout Light Pro models, the M640T features SureFire's new Low-Profile Mount (LPM), offering unprecedented versatility by allowing the user to optimize the light's position relative to the handguard and other rail-mounted accessories. Rugged and reliable, the LPM can be easily and securely attached to any MIL-STD-1913 or M-LOK rail. Its shrouded Z68 push-button tailcap provides easy, instant activation with a single click. Constructed of lightweight aerospace aluminum with a Mil-Spec Hard-Anodized finish, and O-ring sealed to keep out the elements, the M640T is designed, engineered, and precision-manufactured to thrive in combat conditions without sacrificing weapon maneuverability.
