

# DEFENDER-CCW™

MICRO RED DOT

## ELEVATOR PITCH:

Built compact and tough for everyday carry, the Defender-CCW™ still offers a class leading window size, along with exceptional optics with minimal distortion for a truer sight picture. Adjustable brightness lets you find the perfect setting for your eye, while a button lockout feature prevents accidental adjustments while carrying. And with a long battery life and motion activation, you can be confident the Defender-CCW™ will be ready when you need it.

## WHY DID WE MAKE THIS RED DOT?

To provide an optic specifically designed to meet the needs of concealed carry users.

## WHAT IS NEW FOR THIS OPTIC?

- Large Aspherical Lens for a distortion-free sight picture and truer colors.
- ShockShield™ Polymer Insert for shock absorption and added durability.
- Fast-Rack™ Textured Front Face adds grip for racking slide off of any surface.
- Motion Activation automatically wakes up the red dot for use while conserving battery life.

## HOW DOES THIS OPTIC STAND UP AGAINST COMPETITIVE MODELS?

The Defender-CCW™ has the largest window in its class and is ultra durable.

## WHAT ARE THE TOP USES FOR THIS PRODUCT?

Concealed carry and target shooting.

## HOW DOES THIS UNIT COMPARE TO OTHER VORTEX® MODELS?

The Defender-CCW™ is a complete redesign from our current MRDS. Its window is much bigger than the Viper® and Venom® MRDS as well as being much more durable than all of them. The Defender-CCW™ is also smaller and has a Shield RMS footprint.

## WILL THE RED DOT WORK WITHOUT A BATTERY INSTALLED?

No.

## WILL THE MOTION ACTIVATION WORK IF THE UNIT IS TURNED OFF?

No. The motion activation only works when the unit is in sleep mode.

## CAN THE MOTION ACTIVATION FEATURE BE TURNED OFF?

Yes. Powering down the red dot manually will disable the motion activation.

## WHAT FOOTPRINT WILL THIS RED DOT FIT?

The Defender-CCW™ will fit all Shield RMS and Shield RMSc footprints without any modification.

## WHERE IS THIS UNIT MADE?

China.
