

RAZOR[®] HD GEN III

RIFLESCOPE RETICLES

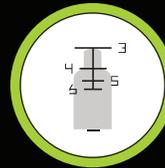

EBR-9 MRAD

Shooters looking for more precision farther down range will find all the wind holds they need to punch out to 1,000 yards and beyond in the EBR-9 MRAD.

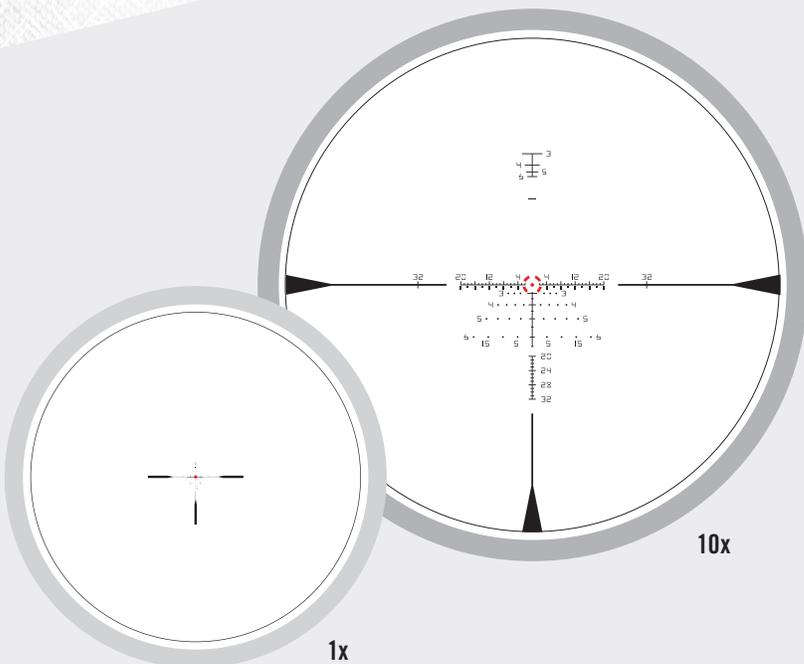

INTUITIVE WIND HOLD GRID

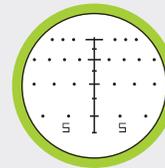

RANGING FEATURE

Place the horizontal hashmark at the base of the target. The 3, 4, 5, and 6 indicate the range in hundreds of yards. The horizontal lines correlate to the width of the shoulders of a silhouette target at each distance.

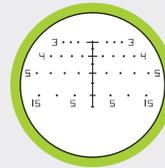

EBR-9 BDC

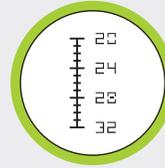

The EBR-9 BDC is built for speed, combining precalculated windholds with the rapid target acquisition of a red dot. While optimized for the .223 platform, the EBR-9 BDC increases the effectiveness of any carbine or battle rifle.

BDC WITH 50 YARD INCREMENTS OUT TO 650 YARDS

5 MPH WIND INCREMENTS

ADDITIONAL MOA SCALE FOR EXTENDED SHOTS
